1 User's guide

1.1 Installation

1.2 Invocation and options

`\documentclass` The mines-thesis class is invoked in the standard fashion.

```
\documentclass[\langle options \rangle]{mines-thesis}
```

There are several options corresponding to the type of the document and its general appearance. They are described below. Generally speaking, the options have `key=value` forms, for example,

```
\documentclass[10pt]{mines-thesis}
```

The default options are `letterpaper,12pt. TODO review? onside? onecol-umn,draft,openany`

1.3 Preprogrammed Formats

```
\title
\author
\year
\degree
\advisor
\coadvisor
\department
\departmenthead
abstract
```

The environment `abstract` must *precede* the `\makefrontmatter` command. Again, this is different from the standard L^AT_EX. Putting `abstract` after `\makefrontmatter` will trigger an error.

```
\begin{abstract}
Here goes the abstract...
\end{abstract}
```

`\makefrontmatter` The front matter of a thesis includes:

1. Title page (Required)
2. Copyright page
3. Submittal page (Required)
4. Abstract (Required)
5. Table of Contents (Required)
6. Lists (Required if included in thesis)
 - (a) List of Figures

- (b) List of Tables
- (c) List of Equations (optional)
- (d) List of Plates
- (e) List of Symbols

7. Acknowledgments

8. Dedication

Invoking

`\makefrontmatter`

will generate all components listed above. It can be commented out until you need the front matter generated.

`\chapter`
`\section`
`\subsection`
`\subsubsection`
`\paragraph`

===== Set-up
===== `\OnehalfSpacing`
`\OnehalfSpacing* \DoubleSpacing \DoubleSpacing*` Text will be double spaced
or 1.5 spaced. Sometimes it is also required to make page notes and floats (including captions) in ‘double’ spacing. The starred version of the two macros above takes care of this.

2 Implementation

```
1 \RequirePackage{ifthen}
```

The `\collect@body` macro in `amsmath` is defined using `\def`. We load `environ` to access the `\long` version of this command

```
2 \RequirePackage{environ}
```

The `review` boolean is defined here for use with the class options.

```
3 \newboolean{review}
```

2.1 Declaration of Options

```
4 \DeclareOption{draft}{\setboolean{review}{true}}
```

```
5 \DeclareOption{final}{\setboolean{review}{false}}
```

```
6 \PassOptionsToClass{final,12pt,oneside,openany}{memoir}
```

```
7 \DeclareOption*
```

```
8 \PassOptionsToClass{\CurrentOption}{memoir}
```

```
9 }
```

```
10 \ExecuteOptions{final}
```

2.2 Execution of Options

```
11 \ProcessOptions\relax
```

2.3 Package Loading

```
12 \LoadClass[oneside,letterpaper]{memoir}
```

2.4 Main Code

Prevent LaTeX from hyphenating the entire document

`\if@afterindent` LaTeX uses the switch `\if@afterindent` to decide whether to indent after a section heading. We just need to make sure that this is always true.

```
13 %
```

```
14 \< *class>
```

```
15 \let\@afterindentfalse\@afterindenttrue
```

```
16 \@afterindenttrue
```

```
17 \< /class>
```

```
18 %
```

2.4.1 Commands to define parameters for the front matter

```
19 \newboolean{auto} % for auto pyramid
```

```
20 \setboolean{auto}{false}
```

```
21 \def\year#1{\gdef\@year{#1}}
```

```
22 \newcommand{\degree}[2]{\gdef\@degree{#1}\gdef\@degreev{#2}}
```

```
23 \def\advisor#1{\gdef\@advisor{#1}}
```

```
24 \def\coadvisor#1{\gdef\@coadvisor{#1}}
```

```
25 \def\department#1{\gdef\@department{#1}}
```

```
26 \def\departmenthead#1{\gdef\@departmenthead{#1}}
```

The following are the initial values for some macros that provide info.

```

Page: A dedication page is optional and not frequently included in a thesis.
However, occasionally the thesis writer wants to dedicate the document to a
professional colleague, friend, or relative. A dedication typically expresses
gratitude for someone's support. If a dedication page is included, it is placed at
the end of the front matter section, following the acknowledgments. Typically, a
dedication page has no title, it simply states, e.g., "For my father." Roman
numeral page numbering continues on the dedication page.
