1 User's guide

1.1 Installation

1.2 Invocation and options

\documentclass

The mines-thesis class is invoked in the standard fashion.

 $\documentclass[\langle options \rangle] \{ mines-thesis \}$

There are several options corresponding to the type of the document and its general appearance. They are described below. Generally speaking, the options have key=value forms, for example,

\documentclass[screen=true, review=false]{mines-thesis}

The default options are letterpaper,10pt. TODO review? oneside? onecolumn,draft,openany

1.3 Preprogrammed Formats

\title
\author
\year
\degree
\advisor
\coadvisor
\department
\departmenthead
abstract

The environment abstract must *precede* the \makefrontmatter command. Again, this is different from the standard LATEX. Putting abstract after \makefrontmatter will trigger an error.

\begin{abstract}
Here goes the abstract...
\end{abstract}

\makefrontmatter

The front matter of a thesis includes:

- 1. Title page (Required)
- 2. Copyright page
- 3. Submittal page (Required)
- 4. Abstract (Required)
- 5. Table of Contents (Required)
- 6. Lists (Required if included in thesis)
 - (a) List of Figures

- (b) List of Tables
- (c) List of Equations (optional)
- (d) List of Plates
- (e) List of Symbols
- 7. Acknowledgments
- 8. Dedication

Invoking

\makefrontmatter

will generate all components listed above. It can be commented out until you need the front matter generated.

\OnehalfSpacing*\DoubleSpacing \DoubleSpacing* Text will be double spaced or 1.5 spaced. Sometimes it is also required to make page notes and floats (including captions) in 'double' spacing. The starred version of the two macros above takes care of this.

2 Implementation

1 \RequirePackage{ifthen}

The \collect@body macro in amsmath is defined using \def. We load environ to access the \long version of this command

2 \RequirePackage{environ}

The review boolean is defined here for use with the class options.

3 \newboolean{review}

2.1 Declaration of Options

```
4 \DeclareOption{draft}{\setboolean{review}{true}}
5 \DeclareOption{final}{\setboolean{review}{false}}
6 \PassOptionsToClass{letterpaper,12pt,oneside,onecolumn,final,openany}{report}}
7 \DeclareOption*{
8 \PassOptionsToClass{\CurrentOption}{memoir}
9 }
10 \ExecuteOptions{draft,letterpaper,12pt}
```

2.2 Execution of Options

11 \ProcessOptions\relax

2.3 Package Loading

12 \LoadClassWithOptions{memoir}

2.4 Main Code

Prevent LaTeX from hyphenating the entire document

2.4.1 Commands to define parameters for the front matter

```
13 \newboolean{auto} % for auto pyramid
